

Engineering Maths (MAST20029) Tutorial

Me/Facilitator: Owen

Email: o.emery@unimelb.edu.au

About me:

Applied Mathematics Masters Student.

Undergraduate and Honours at the University of Western Australia (with some coursework at the University of Melbourne & the National University of Singapore).

Just moved to Melbourne a few weeks ago.

Expectations of the Class

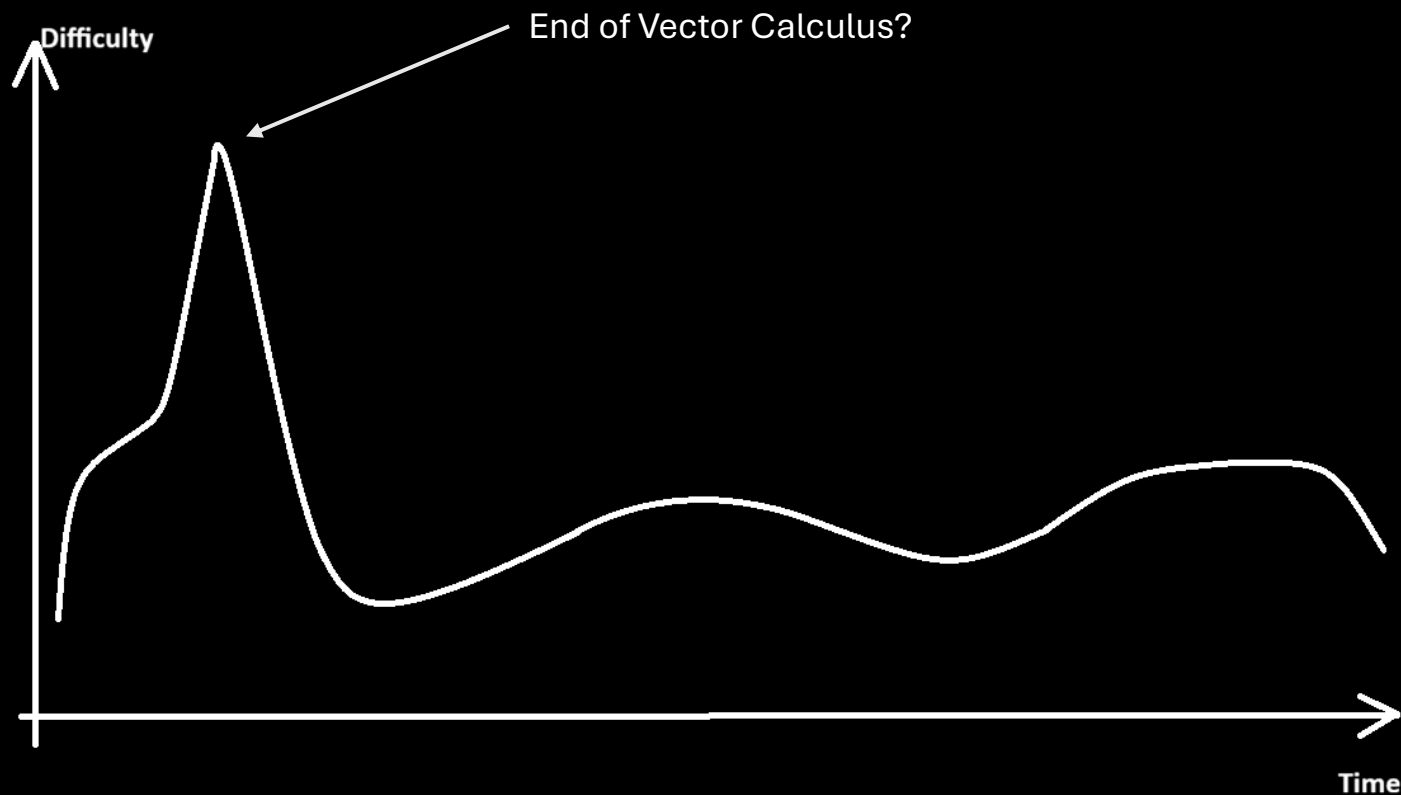

Similar to prior Mathematics classes: Working in groups of 2-3 on the whiteboards.

(Please do this so that my supervisor doesn't get angry at me)

Sometimes: I'll give you a short summary of concepts at the start or have you look at something interesting I want to show you! (< 5 mins)

- Please talk to me or let me know if you're confused.
- I want all of you to do well, (and feel pleased with what you have achieved).

Difficulty Curve? Maybe?

That's all!

Please organise yourself into groups and I'll come round to chat with you and your group members soon!
